## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 6/3/2005 has been entered.

### ***Allowable Subject Matter***

2. Claims 13-21 are allowed.
3. The following is an examiner's statement of reasons for allowance:

#### **Claim 13:**

None of the prior art of record teaches the controlling portion changes the voltage applied to the transfer member from the first transfer voltage to 0 volt before the trailing edge of the recording material passes the transfer position and changes the voltage to a second transfer voltage to the transfer member after the trailing edge of the recording material passes the transfer position, the second transfer voltage having the same polarity as the first transfer voltage, and an absolute value of the voltage value of the second transfer voltage being smaller than the absolute value of the first transfer voltage.

Claims 14, 19, and 20:

Art Unit: 2852

None of the prior art of record teaches the controlling portion turns off the first transfer voltage applied to the transfer member before the trailing edge of the recording material passes the transfer position and applies a second transfer voltage to the transfer member after the trailing edge of the recording material passes the transfer position, the second transfer voltage having the same polarity as the first transfer voltage, and an absolute value of the voltage value of the second transfer voltage being smaller than the absolute value of the first transfer voltage.

## Claims 15-18:

None of the prior art of record teaches the controlling portion changes the voltage applied to the transfer member from the first transfer voltage to the second transfer voltage before the trailing edge of the recording material passes the transfer position and changes to the third transfer voltage to the transfer member after the trailing edge of the recording material passes the transfer position, the second transfer voltage having the same polarity as the first transfer voltage, and an absolute value of the voltage value of the second transfer voltage being smaller than the absolute value of the first transfer voltage.

## Claim 21:

None of the prior art of record teaches the controlling portion changes regardless of whether the recording material is a front or back side, the voltage applied to the transfer member from the first transfer voltage to a second transfer voltage before a trailing edge of the recording material passes the transfer position and changes the

Art Unit: 2852

voltage to a third transfer voltage after the trailing edge of the redoing material passes the transfer position.

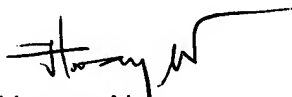

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Inquiry***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoang Ngo whose telephone number is (571) 272-2138. The examiner can normally be reached on 6:00am - 2:30pm.
